EDUCATION

Asansol Engineering College <i>Master of Computer Applications (MCA) - CGPA: 8.09/10</i>	Asansol, West Bengal <i>Oct 2023 – July 2025</i>
Asansol Engineering College <i>Bachelor of Computer Applications (BCA) - CGPA: 9.28/10</i>	Asansol, West Bengal <i>Sept 2020 – July 2023</i>

EXPERIENCE

Junior Application Support Analyst (Intern) <i>EPAM Systems</i>	Jan 2025 – Jun 2025 <i>Hyderabad, Telangana, India</i>
• Gained knowledge about .NET C# enterprise-level applications and understood basic to advanced-level concepts • Collaborated with cross-functional teams following Agile Scrum methodology to deliver solutions for critical incidents and implement preventive measures • Documented technical procedures and created knowledge base articles, enhancing team productivity	

TECHNICAL SKILLS

Languages: C#, Java, SQL, Shell Scripting (Bash)
Frameworks & Technologies: .NET Framework, .NET Core, ASP.NET, Entity Framework
DevOps & Cloud: Docker, Kubernetes, AWS (EC2, S3 basics), GitHub Actions (CI/CD), Git Netlify
Databases & Tools: PostgreSQL, MySQL, MongoDB, Firebase, Visual Studio, JIRA, Linux/Unix
Core Competencies: Object-Oriented Programming (OOP), SOLID Principles, Design Patterns (Factory, Singleton), RESTful APIs, Agile/Scrum, Asynchronous Programming, Test-Driven Development

PROJECTS

Finance Data Processing API <i>C#, .NET 8, PostgreSQL, EF Core, Docker</i>	
• Architected a secure REST API for financial ledger management, implementing JWT authentication and Role-Based Access Control (RBAC) to separate admin oversight from standard user data • Engineered dynamic data filtering, search, and pagination endpoints using LINQ, optimizing backend performance for querying large datasets • Designed an enterprise-ready PostgreSQL database schema using Entity Framework Core, featuring strict decimal precision for financial accuracy and audit-proof “soft delete” guardrails • Containerized the application and database environments using Docker Compose for seamless, reproducible deployment	
Autonomous Claims Processing Agent <i>C#, .NET 8, Google Gemini AI</i>	
• Engineered an AI-driven claims processing pipeline using .NET 8 to autonomously ingest, parse, and analyze insurance documents • Integrated Google Gemini AI to perform intelligent data extraction from unstructured PDF claims, significantly reducing manual data entry • Developed a custom rule-based routing engine to evaluate extracted claim data and automate decision-making workflows	
Real-Time Inflation-Adjusted SIP Calculator	Jan 2025 – Jun 2025
<i>C#, .NET, RESTful API, Asynchronous Programming, JSON</i>	
• Developed a robust financial calculation tool in C# to project Systematic Investment Plan (SIP) returns over a 30-year horizon • Integrated World Bank API using HttpClient to fetch real-time Consumer Price Index (CPI) data, enabling dynamic inflation-adjusted maturity calculations • Implemented complex financial algorithms to determine nominal returns, real rates of return, and purchasing power erosion	

- Engineered custom error-handling framework using user-defined exceptions (ZeroAndNegativeException, InvalidYearException) to ensure data integrity
- Utilized asynchronous programming patterns (async/await) to prevent UI blocking during network requests and System.Text.Json for efficient data parsing

Console-Based Banking System

Jan 2025 – Jun 2025

C#, .NET, Factory Design Pattern, OOP, SOLID Principles

- Designed a scalable console-based banking application using Object-Oriented Programming principles, including inheritance, polymorphism, and encapsulation
- Implemented Factory Design Pattern to streamline the creation of Savings and Current accounts based on runtime user input
- Developed robust custom exception handling framework (InsufficientBalanceException, DuplicateAccountNumberException) to ensure transaction safety
- Enforced SOLID principles and business logic constraints such as minimum balance requirements and overdraft limits specific to account types

PAST ACHIEVEMENTS & LEADERSHIP

Served as **Computer Application Department Representative for 5 years (BCA - MCA)** - Represented my department during the visit of NAAC Peer team and also at different occasions during my college journey

Served as **Training and Placement Coordinator at AEC** - Led campus recruitment initiatives, coordinating with multiple companies
